General Information

Journal references in Mathematical Reviews are given in the following form: Rückschritte der Math. (6) 5(56) (1960/61), no. 2, 18-53 (1962), where, after the abbreviated title, one has: (series number) volume number(volume number in first series, if given) (nominal date), issue number if necessary, first page-last page (imprint date). If only one date is given, this will usually be interpreted as the nominal date and will follow the volume number. If no volume number is given, the year will be used in its place. The symbol *precedes the title of a book or other nonperiodical that is being reviewed as a whole. If an issue of a journal needs to be reviewed as a whole (e.g., when it is a collection of articles dedicated to an individual) and an ad hoc title is devised for this purpose then the latter will appear in braces {}

References to reviews in Mathematical Reviews before Volume 20 (1959) are by volume and page number, e.g., MR

15, 122; from Volume 20 to Volume 58 (1979), by volume and review number, e.g., MR 20 #4185 or MR 23 #A513; from 1980 on, by issue and review number, e.g., MR 80a:46017. References to reviews in Jahrbuch über die Fortschritte der Mathematik and Zentralblatt für Mathematik are by volume and page number for the period before 1972 (e.g., Jbuch 50, 173; Zbl 29, 323) and by volume and review number since 1972 (e.g., Zbl 218:46017). Reviews reprinted from Applied Mechanics Reviews, Computing Reviews, Electrical & Electronics Abstracts, Mathematics of Computation, Operations Research, Physics Abstracts, Referativnyl Zhurnal Matematika (Mekhanika, etc.), Statistical Theory and Method Abstracts, or Zentralblatt für Mathematik are identified in parentheses following the reviewer's name by AMR, CR, EEA, MC, OR, PA, RZhMat (RZhMekh, etc.), STMA, Zbl, respectively.
